*A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.*

## EFFECTIVENESS OF PREDICT-OBSERVE-EXPLAIN TECHNIQUE

LAP Lambert Academic Publishing. Paperback. Book Condition: New. Paperback. 208 pages. Dimensions: 8.5in. x 5.8in. x 0.7in. The purpose of this research program was to explore the effectiveness of the Predict-Observe-Explain (POE) teaching learning to diagnose students understanding of science and identify students level of achievement with reference to the Science Student Outcome Statements for Australian schools. This research employed an interpretive action research approach with a sample of students from three Australian metropolitan high schools in grades 9, 10, 11, and 12 whose ages ranged between 14 and 17 years. Three data collection methods were used to generate data for interpretation, namely, Chi et al. s theory of ontological categories, Hewson and Hennesseys conceptual change theory to determine the epistemological status of students understanding of science, and Chinn and Brewers model to classify types of students responses to contradictory observations. The findings in this research reveal that these POEs were effective in capturing a range of possible student observations and prediction outcomes when worded in an open-ended format. Quality information on students understanding and on the way they responded to contradictory data was obtained when POEs were administered. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
