Not illustrated. 1909 Excerpt: . in 1812, Straub, of Berne, suggested that it was the active principle of the toasted sponges (*Spongia usta* or *tosta*) and the *Aethiops vegetabilis*, which had been used in the treatment of goiter at least since the thirteenth century. Since 1820 iodine, as such or in combination, has been in constant use in the treatment of diseases of the thyroid. About the middle of the last century great interest was aroused by the work of Chatin, Marchand, and others on the relation of iodine in drinking water to goiter. The more recent history of this subject began with the revival of interest in the physiology and pathology of the thyroid gland which was stimulated by the work of Gull and Ord on myxoedema and of Kocher and Reverdin on the effects of the removal of the thyroid in man. This work was followed, partly...
