Not illustrated. 1896 Excerpt: .constantly stirring the cream with the glass rod, allow the liquid to flow from the burette into the tumbler until the entire contents of the tumbler shows a pink tinge. Stop adding the solution from the burette the moment the color is permanent. 4. Read the level of the liquid remaining in the burette. The reading shows the amount of acid present. The experience of those using the test indicates that where the acidity of the cream is right, to secure the best results in yield and flavor of butter, from 38 to 42 cc. of the neutralizer will be required for the test. It is a simple matter for each butter maker to learn by experiment the exact degree of acidity and churning temperature suited to the best results, and with these as standards reduce the process of butter-making to a certainty. By testing his cream in the afternoon the butter-maker will be able to set it to ripen at such a temperature that it will show the proper acidity for churning next morning. In testing the milk for cheese-making the same directions are to be followed, excepting that a much less acid condition is required; probably 15-20 cc. will give the best results. The whole numbers are cubic centimeters; the intermediate divisions are fractions of a cubic centimeter. Precautions in Using the Test.--The solution marked Neu. tralizer is prepared of a certain strength. It is essential that this strength remain constant. Never let this solution Stand without...
