

Recent Trends in Nonlinear Partial Differential Equations II: Stationary Problems

By -

American Mathematical Society, United States, 2013.

Paperback. Book Condition: New. 248 x 178 mm. Language:

English . Brand New Book. This book is the second of two

volumes that contain the proceedings of the Workshop on

Nonlinear Partial Differential Equations, held from May 28-

June 1, 2012, at the University of Perugia, Italy in honor of

Patrizia Pucci's 60th birthday. The workshop brought together

leading experts and researchers in nonlinear partial

differential equations to promote research and to stimulate

interactions among the participants. The workshop

programme testified to the wide ranging influence of Patrizia

Pucci on the field of nonlinear analysis and partial differential

equations. In her own work, Patrizia Pucci has been a seminal

influence in many important areas: the maximum principle,

qualitative analysis of solutions to many classes of nonlinear

PDEs (Kirchhoff problems, polyharmonic systems), mountain

pass theorem in the critical case, critical exponents, variational

identities, as well as various degenerate or singular

phenomena in mathematical physics. This same breadth is

reflected in the mathematical papers included in this volume.

The companion volume (Contemporary Mathematics, Volume

594) is devoted to evolution problems in nonlinear partial

differential equations.

Reviews

Basically no terms to clarify. It is actually written in basic terms rather than confusing. I found out this ebook from my dad and I suggested this book to find out.

-- **Elinore Vandervort**

If you need to add benefit, a must buy book. I could possibly comprehend every little thing out of this composed e pdf. I am quickly could get a enjoyment of looking at a composed book.
